

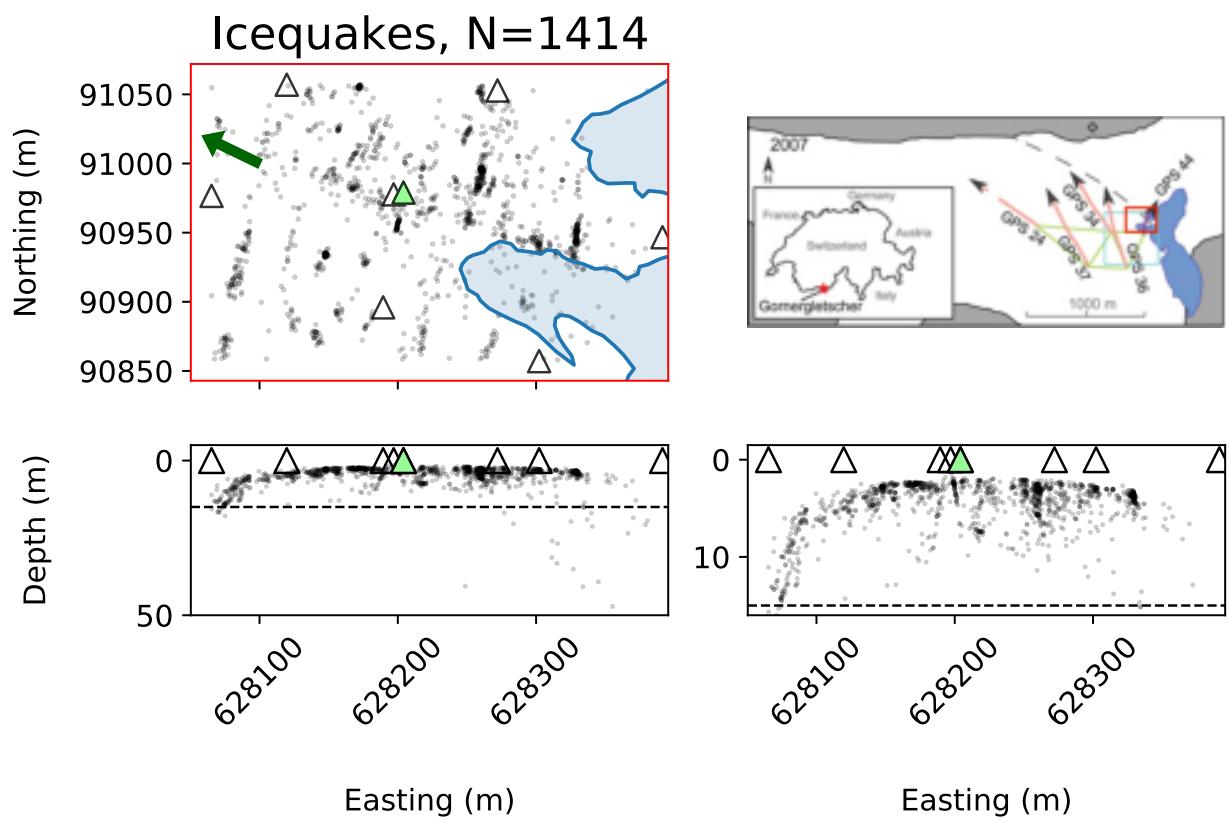

Figure 1

Top panel showing GPS, Lake and precip with icequake data
 Rescale temp, put label on right y axes
 left-orient title?

Figure 2

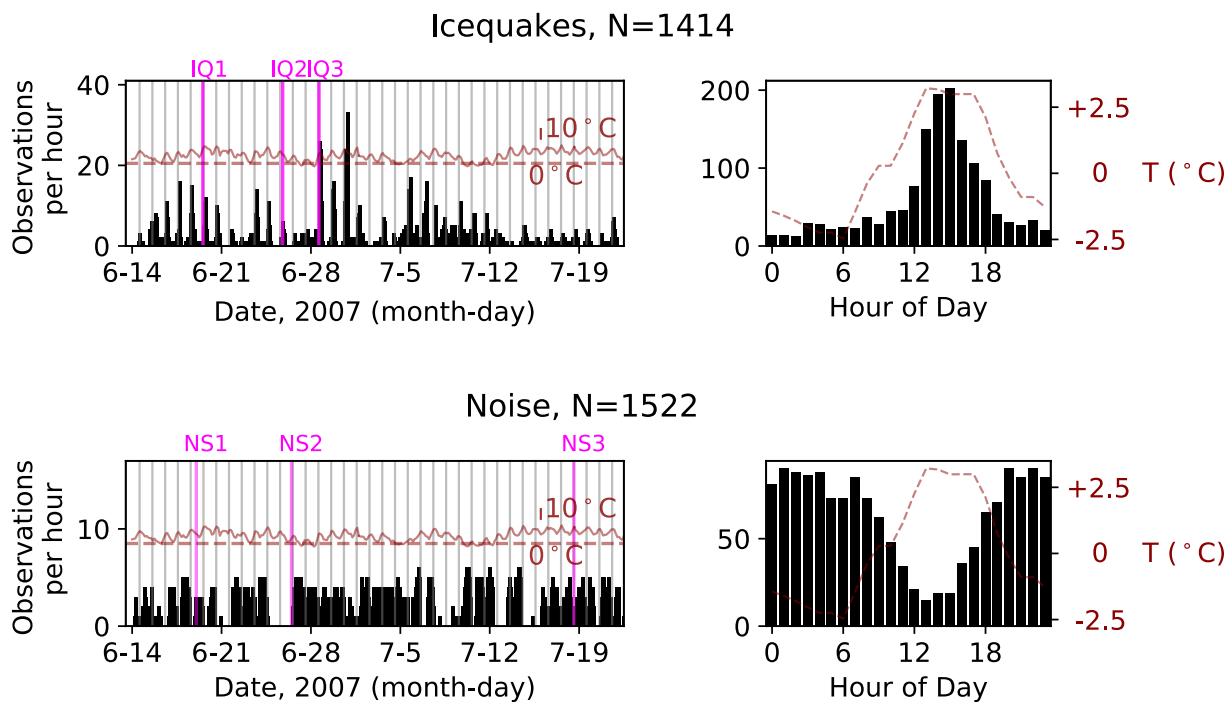

Figure 3

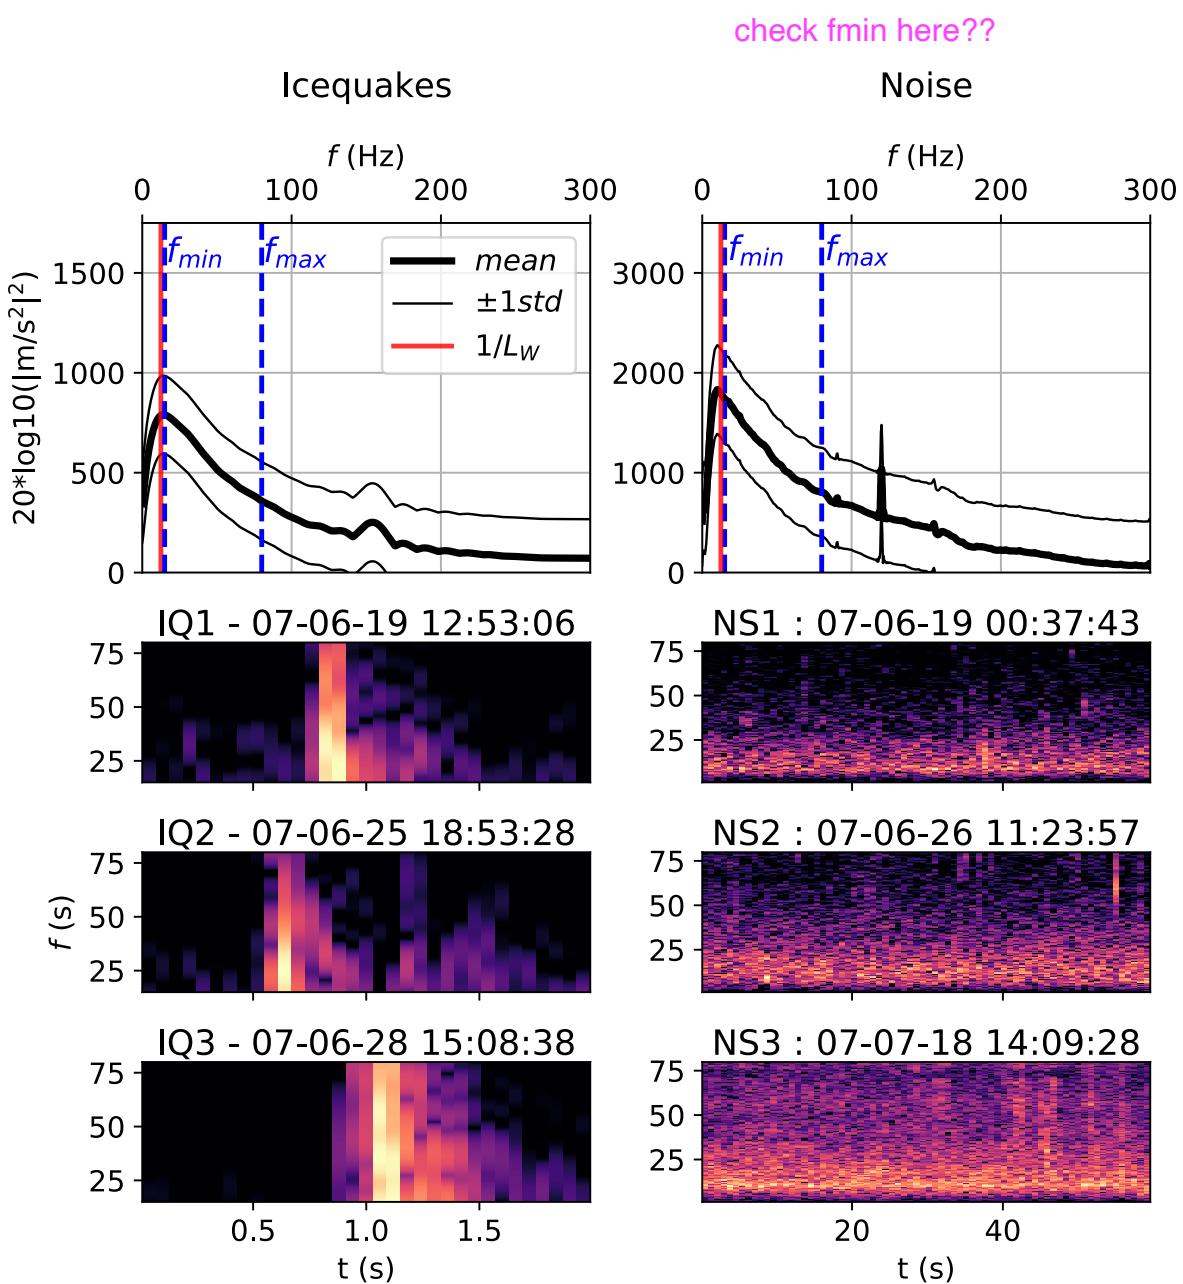

Figure 4 — add Kmeans shows fingerprint examples (photoshop!!)

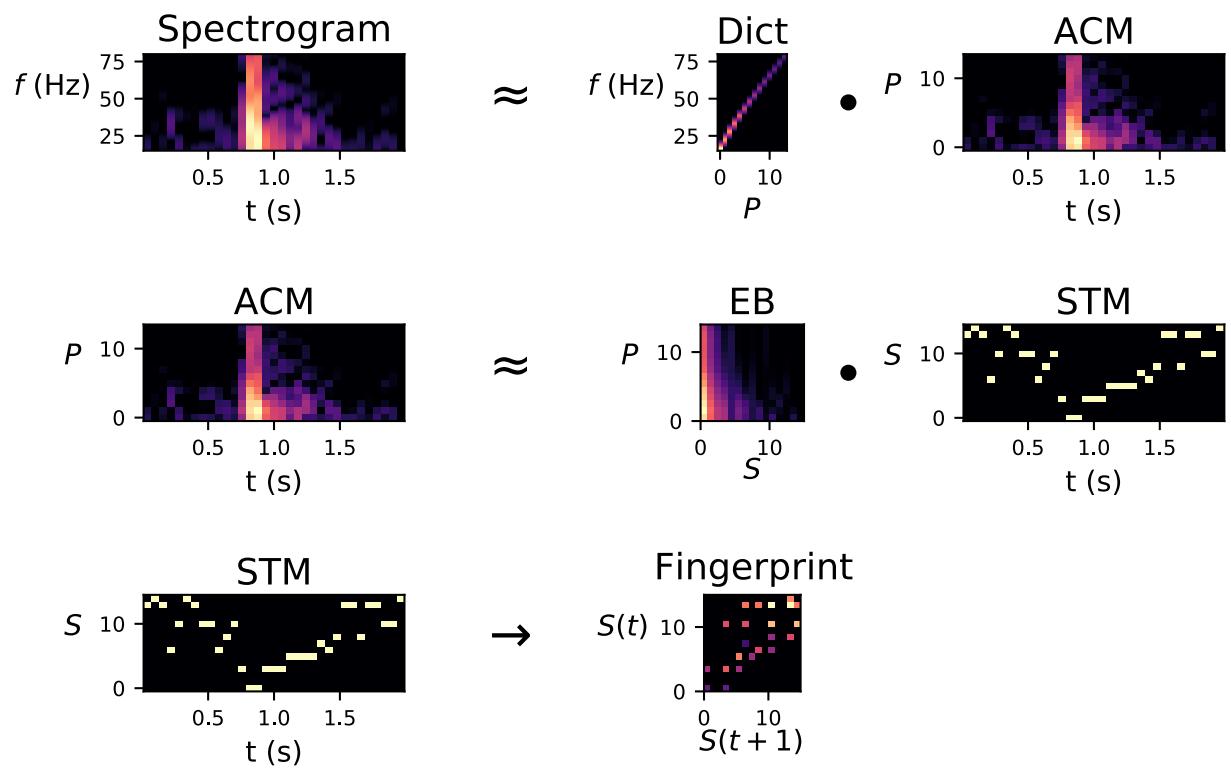

Figure 5 - **PCA by cluster and time**

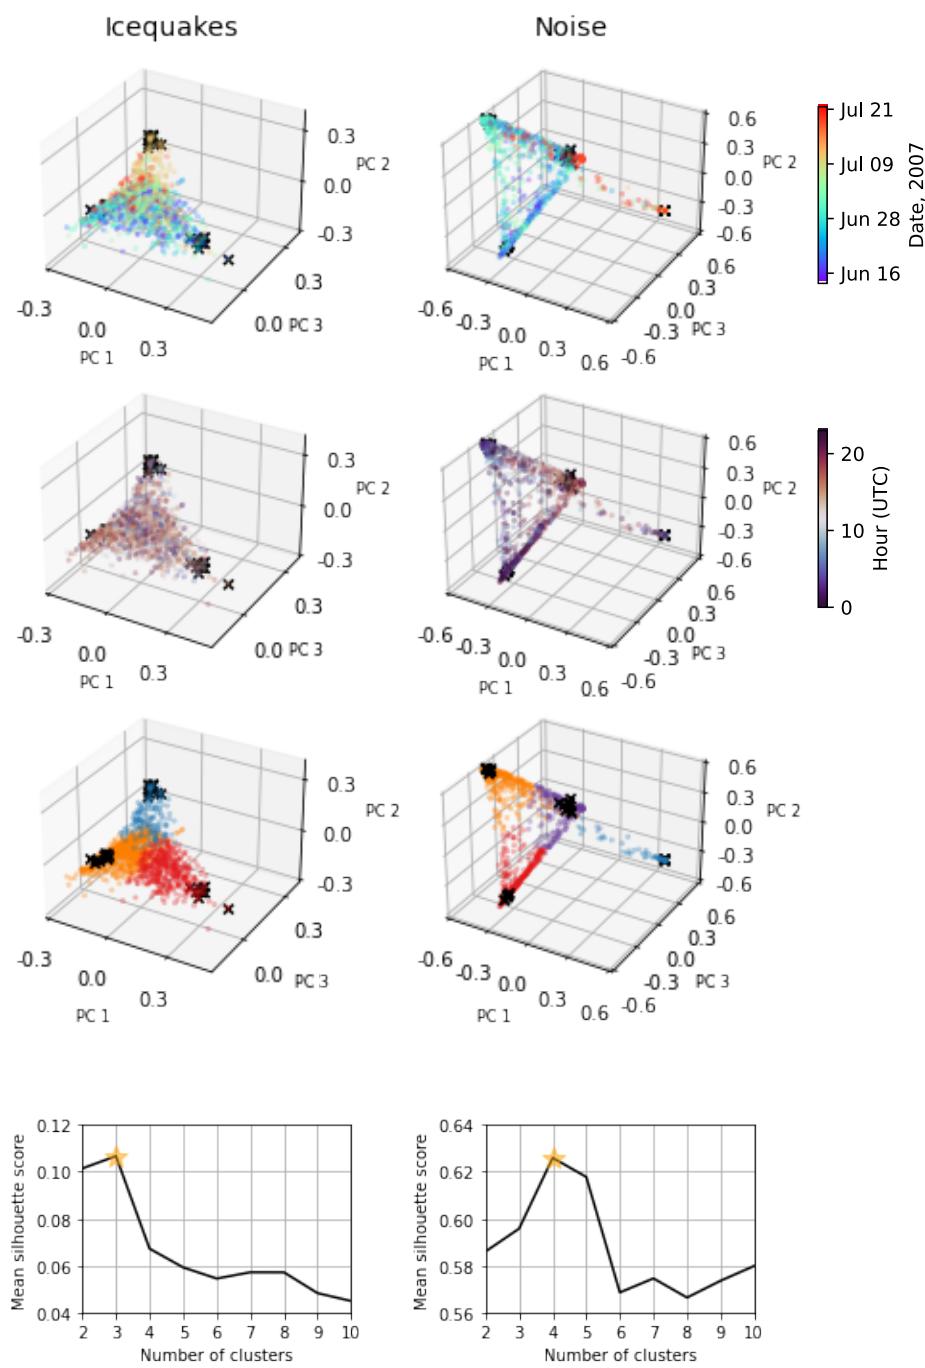

Figure 6 - FPs

stack top F FPS instead? Then normalize by max element in summed FPs

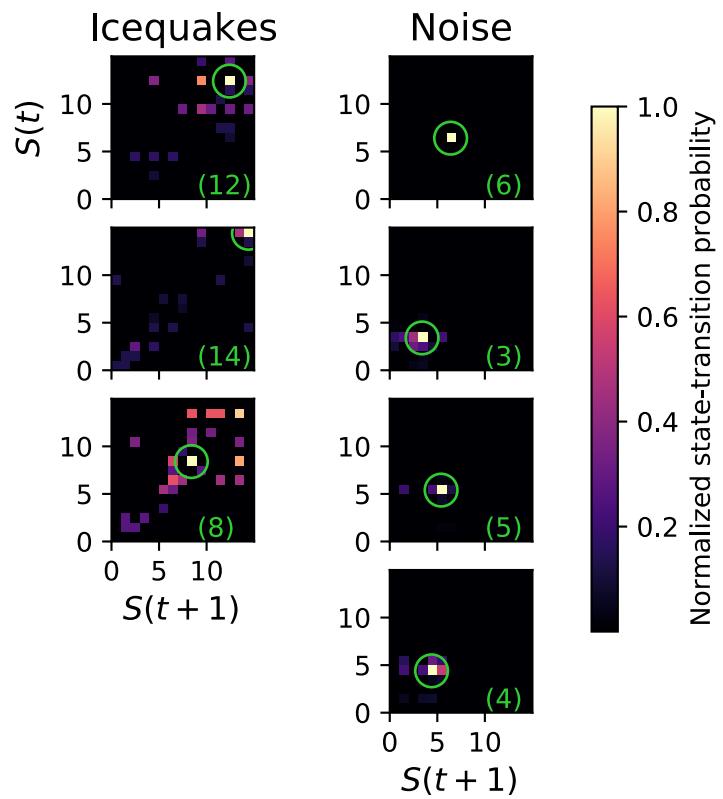

Figure 7 - rep events (check indexing on this for gridspec ... too narrow?)

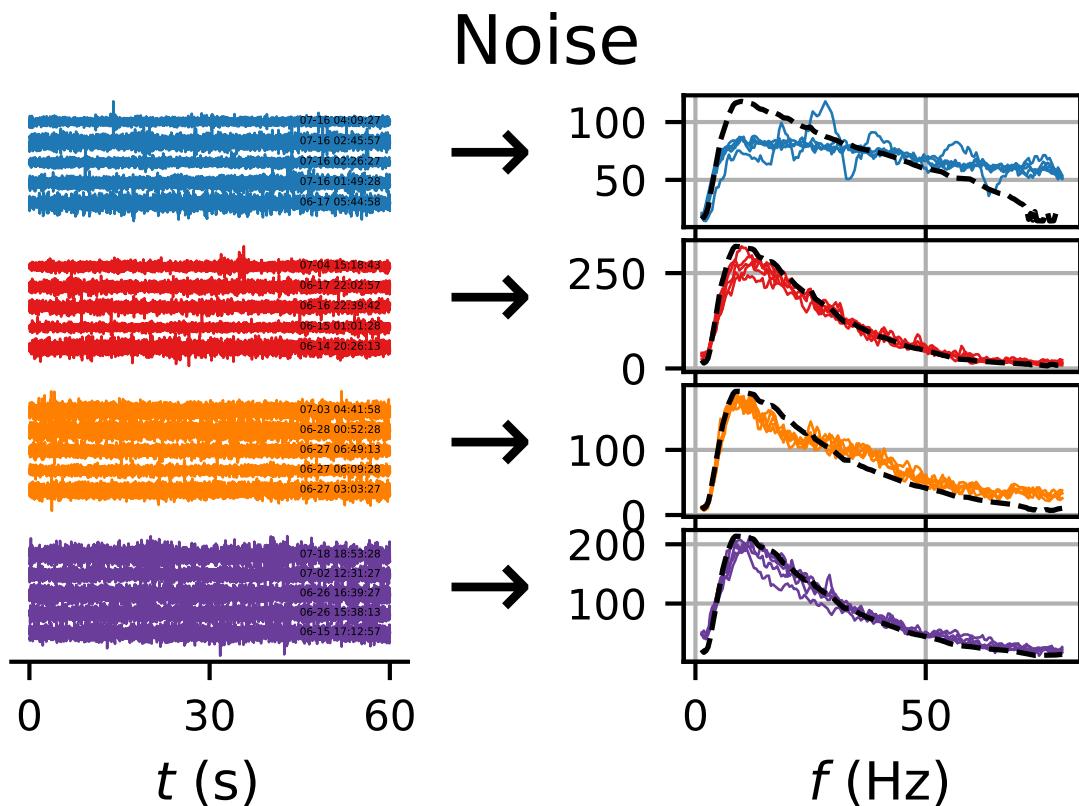

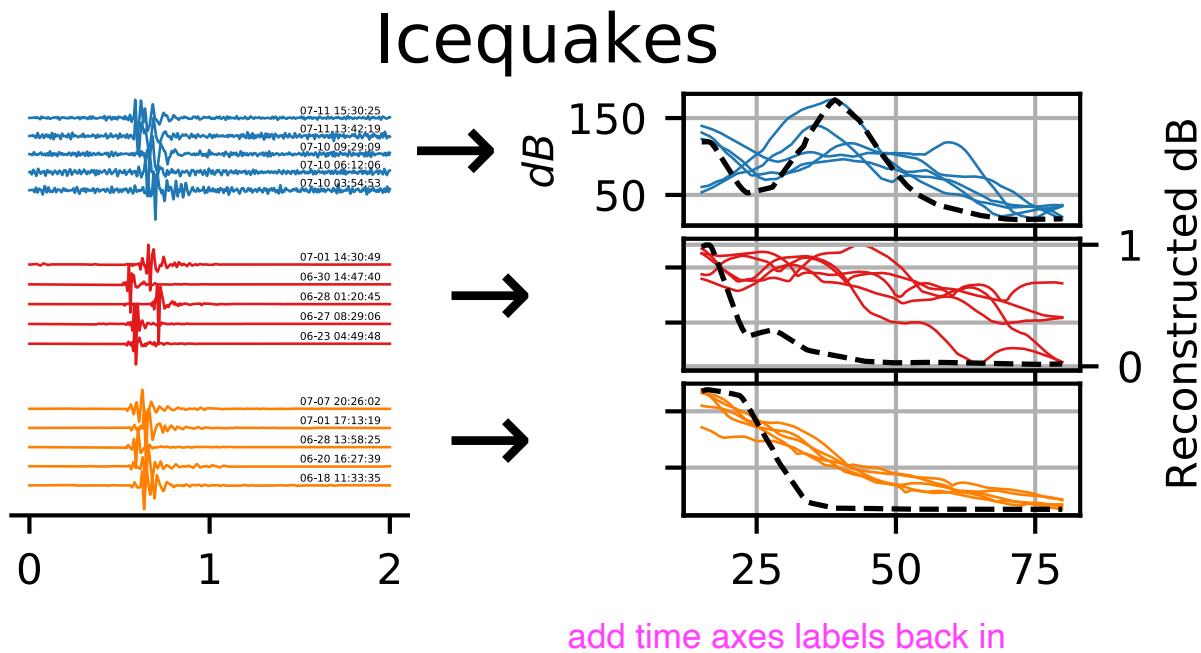

Figure 8

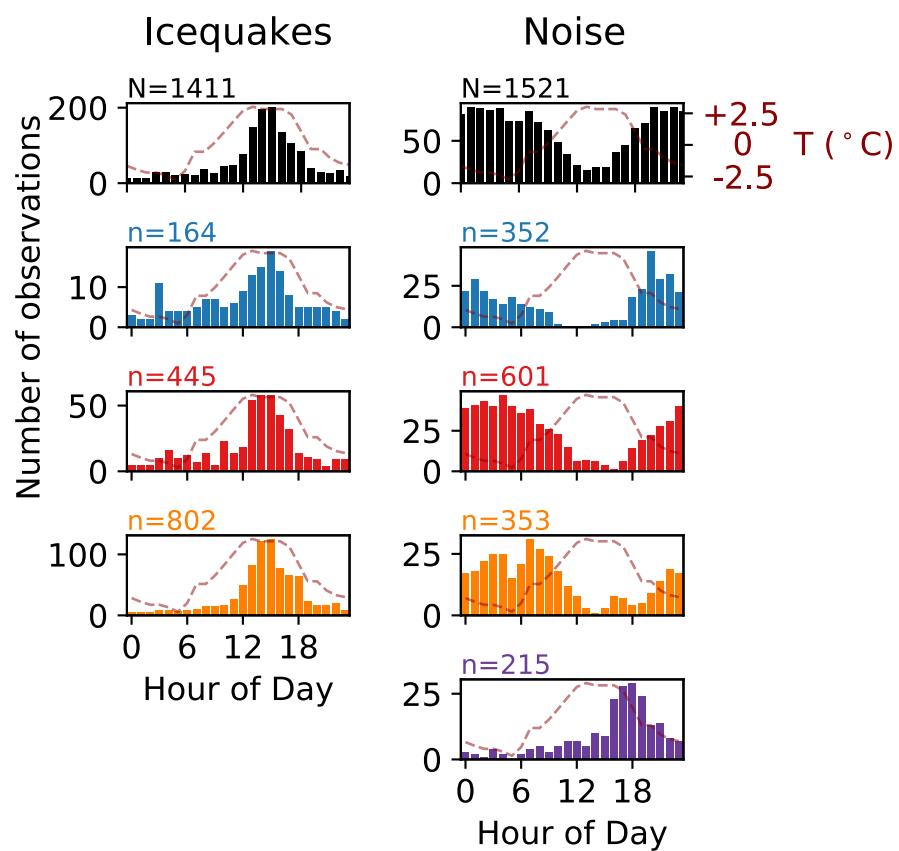

Figure 9 (fix velocity label, ylim for lake/rain)

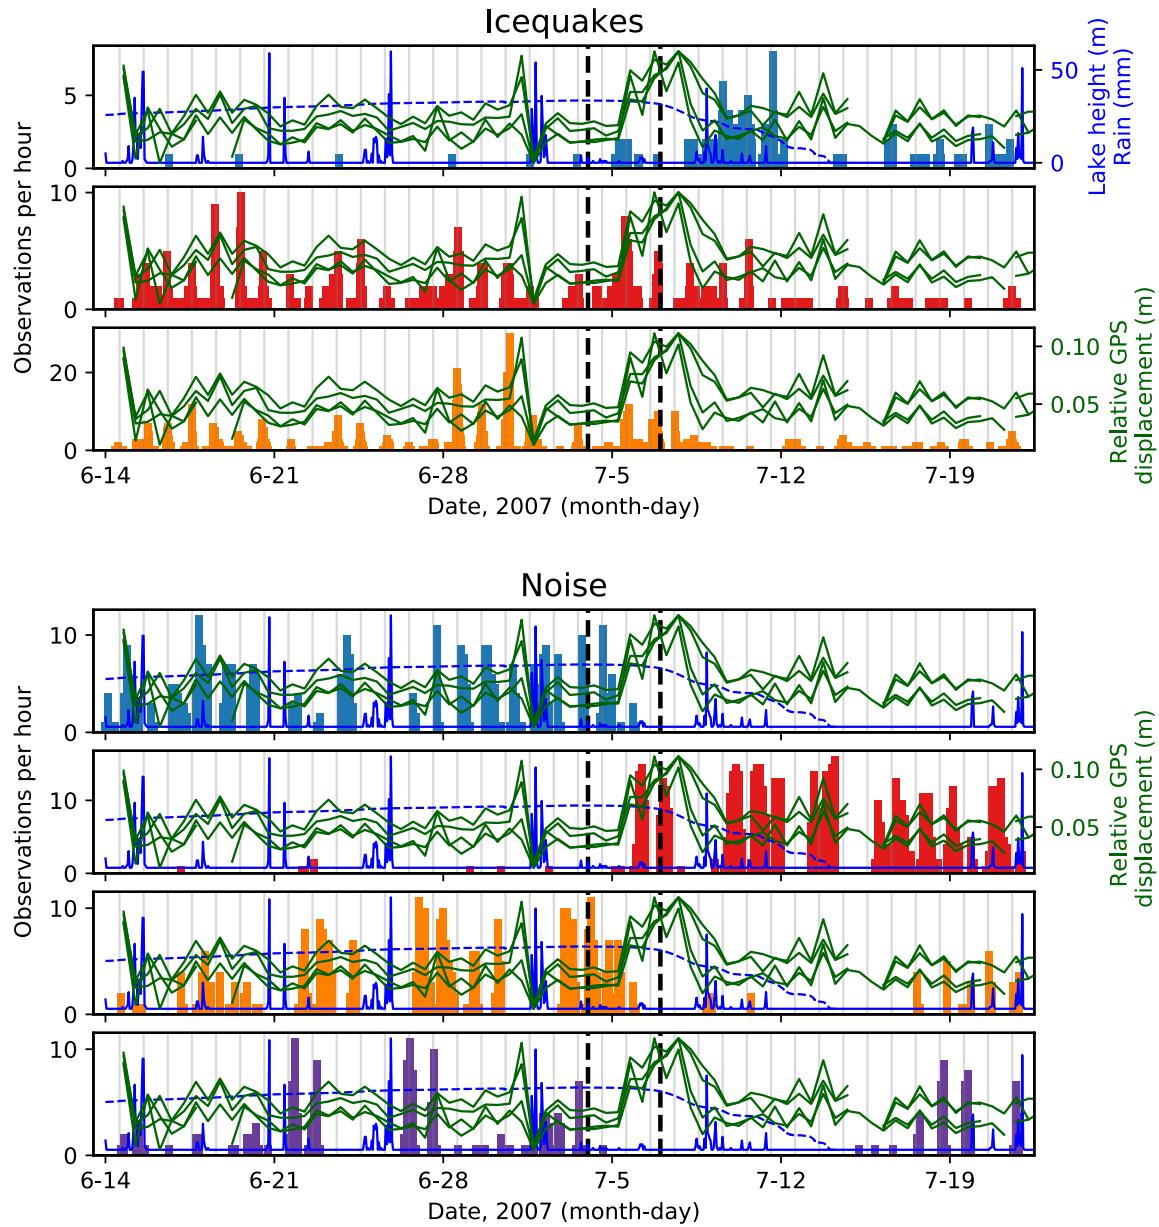

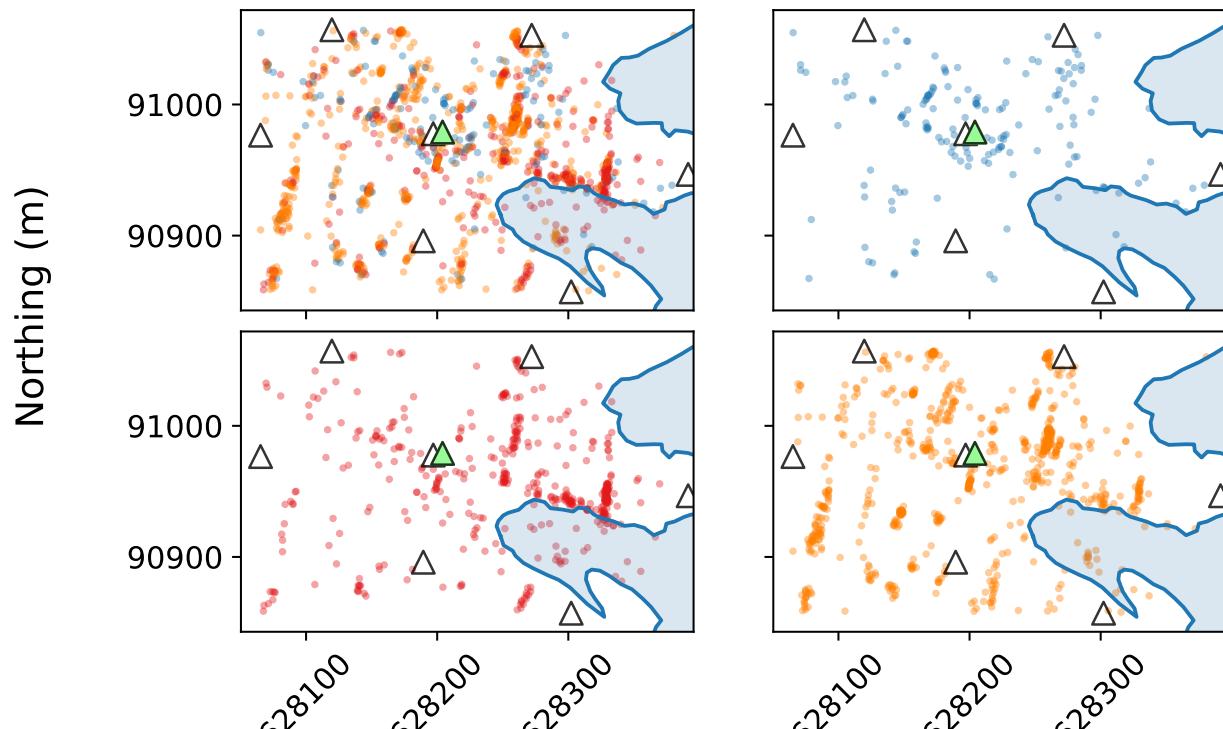

Figure 10

Easting (m)

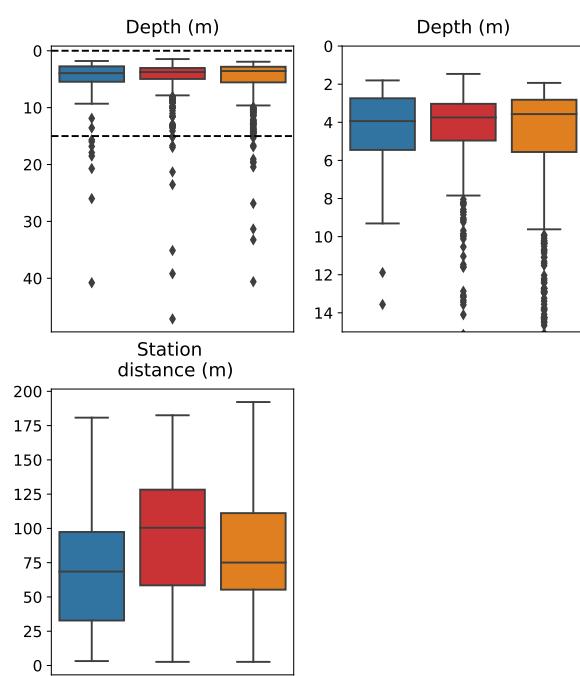

Figure 11 - box plot

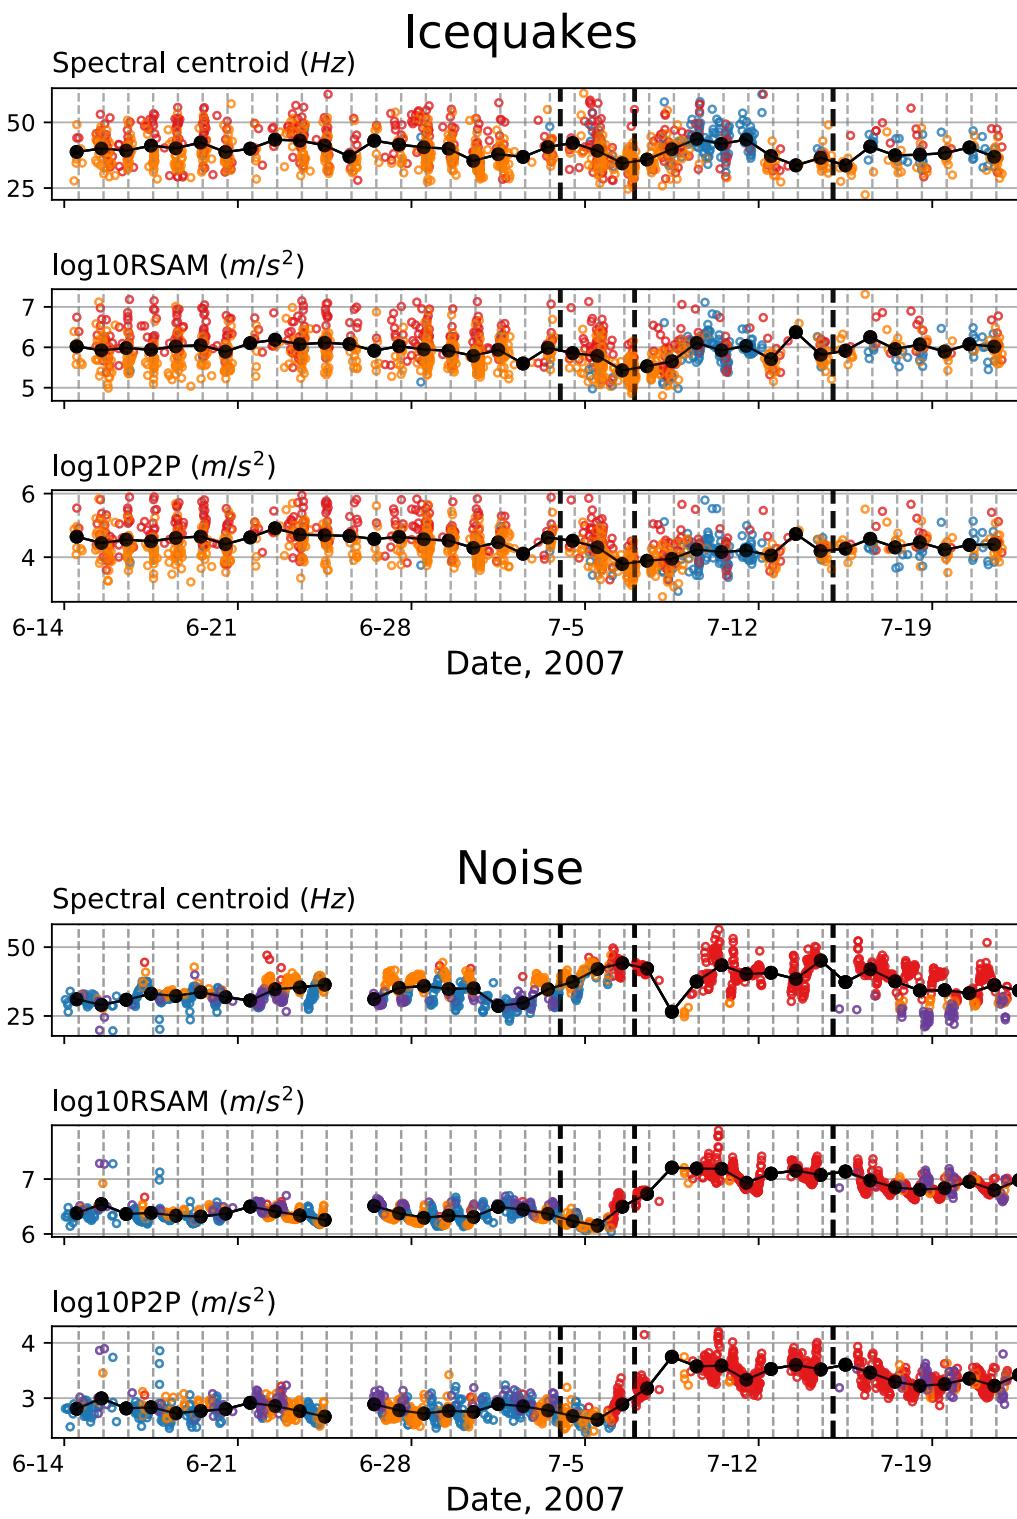

Figure 12 - kmeans on spectra

Figure 13 -reconstructed spectra
